

Northern California Pipe User's Group

We invite you to become a member of the Pipe User's Group and be a part of developing standards and discovering interesting new technologies. The Pipe Users Group (PUG) is a Forum of Collection System Owners, Engineers, and Industry Professionals dedicated to:

- Discussing and Evaluating Rehabilitation Options and Methods
- Improving the Design, Construction, and Operation of Sewer and Water Systems
- Pooling Our Resources
- Assessing and Understanding Contractual and Regulatory Issues Associated with Public Infrastructure Construction Projects

The group hosts meetings monthly. We have demonstrations of and presentations on new and existing products and rehabilitation methods, an annual seminar in February where members are encouraged to present, and we offer valuable resources, discounts, and opportunities to our members. Membership in PUG is open to public agencies, consultants, contractors, vendors, and suppliers. Member agencies pay annual dues of \$350. Members are encouraged to contribute their time and experience to working on PUG issues. If you're interested in joining the Pipe User's Group, please visit our website at www.norcalpug.com for an application, or contact the PUG Secretary, Roberts McMullin, URS Corporation, at (510)874-3102.
